QUALITY-BUILT™

MASTER CYLINDERS | CILINDROS MAESTROS | MAÎTRES-CYLINDRES

MPA's full line of replacement Brake Master Cylinders are engineered to fit and function like OE and each unit is 100% pressure tested for worry-free performance.

1. Caps and Floats

Replacement caps and float switches included where available.

2. Reservoirs

Constructed from durable high-strength plastic for improved resistance to thermal fatigue and failure.

3. New Negative-Ground Sensors

Eliminates the transfer of potentially faulty sensors, leading to possible misdiagnosis and future service requirements.

4. Precision Machining

Micro-finished bores and pistons provide smooth, consistent pedal feel and stopping power.

5. Dependability

100% New EPDM Seals and O-Rings maintain consistent brake pressures for safe stopping power.

6. Direct OE Replacement

Engineered and manufactured to restore brake system functionality.

7. Ready for Anything

All master cylinder units are 100% pressure tested on computerized equipment for optimal performance.

8. Quality Control

Strict manufacturing quality-control standards and full end-of-line quality inspections help reduce costly comebacks.
